Song Inspiration and story:

“Feel the Breeze” takes listeners on a relaxed, sun-kissed journey inspired by the natural beauty of Kaua’i, Hawaii. Written by Bryan Martin after his first visit to the island in 2023, the song captures the serene rhythm of island life – golden sunrises, breaching whales, and quiet mornings with coffee by the sea.

The spark came during a helicopter ride over Kaua’i’s rugged peaks and cascading waterfalls, where the island’s untouched beauty left a lasting impression. From wild roosters to Jurassic landscapes, Bryan’s experience became a lyrical tribute to nature’s wonder and a longing to return – to once again feel the breeze.

Ryan Dsouza, known for his soulful work with The Chickpeas, brings the song to life with warmth and authenticity. His production layers gentle acoustic guitar and piano with harmonica and banjo to create a laid-back, beachy rhythm that mirrors the island’s tranquil spirit.

With its sing-along chorus and vivid imagery, Feel the Breeze is more than a song – it’s an invitation to pause, unwind, and let Kaua’i’s magic carry you away.
